

CONCEPTS;

1. Primary colors are called primary because they cannot be mixed from other colors.
2. Secondary colors are mixed from two primaries.
3. Tertiary colors exist between secondary and primary colors
4. Only two primaries are used to keep a clear color. When three primaries are present, the color is muddy. Three primaries can make black.

VOCABULARY WORDS: COLOR WHEEL

Primary color: A color that cannot be mixed from other colors

Secondary color: A mixture between two primary colors

Tertiary color: A mixture between a secondary and a primary color

Adjusted color: Any color that contains three primary colors
